

# Have you seen two-horned Trapa?

This aquatic invader is spreading from pond to pond in Northern Virginia, destroying recreational, aesthetic, and ecological value. If caught early, it's easy to eliminate. If you see Trapa, please send a photo to [sara.tangren@dc.gov](mailto:sara.tangren@dc.gov).

Please help us stop Trapa. Share this information with all the pond owners you know in the MD-DC-VA region!
